PROFESSIONAL SUMMARY

Full-Stack Software Developer experienced in building and maintaining **production web, mobile, and AI systems** across the full application stack. Experience as a **team lead**, with a proven track record of owning complex technical problems and delivering **highly performant, scalable products**.

EDUCATION

GetBuilding | *Full Stack Software Engineering*

Memorial University of Newfoundland | *B.S. in Biology*

EXPERIENCE

Full-Stack Software Developer | *Enaimco* - St. John's, NL
February 2026 – Present

- Building **end-to-end features** on the core product team developing software that modernizes **subsea energy operations**, with a focus on performance, maintainability, and scalable systems.
- Built an **event-driven global search system** backed by **materialized views**, enabling performant search across application data.
- Developing **production AI workflows and infrastructure**, including **Langfuse tracing and observability** across LLM interactions.

Enterprise Software Team Lead | *Nutraforge Technologies* - St. John's, NL
October 2024 – November 2025

- Led development of **NutraForge PRO**, an enterprise dashboard delivering **real-time data-driven insights** on client meal logs and performance metrics for nutrition professionals.
- Built **production backend infrastructure** spanning Stripe billing, Auth0 RBAC, and **multi-tenant data retrieval and caching**, contributing to a **50% reduction in application latency**.

PROJECTS

MergeMole | *mergemole.app*

- **macOS menu bar app** using **Apple Foundation Models or local LLMs** to analyze PR diffs, summarize changes, estimate **review effort**, and rank pull requests by priority.

Kaboodle | *kaboodle.now*

- Mobile packing app with **5,000+ users**, generating personalized packing lists through a **recommendation engine** that maps trip parameters to an item dataset.

Blob.you | *blob.you*

- **Real-time multiplayer** game where user-drawn shapes battle using **deterministic Matter.js physics**, WebSocket-based matchmaking, a **geometry-based stat system**, and an integrated **Discord coin economy for wagering**.

SKILLS

Languages: JavaScript, TypeScript, Dart, Swift, SQL, Rust
Frameworks & Libraries: React, Next.js, Astro, Flutter, Node.js, Deno, Hono, Express
Databases & Backend: PostgreSQL, MongoDB, SQLite, Redis
Cloud & Infrastructure: Google Cloud, AWS, Azure, Cloudflare, Docker
